GIGA PLUS PUMP ADDS PRECISION AND POWER TO ANY AUTOLUBE SYSTEM

Buffalo, NY – New to North America, the GIGA PLUS central lubrication pump is suitable for any type of autolube system: sectional, single line, dual line and progressive systems.

A GIGA PLUS is like having three pumps in one! It has three independent outlets for lubricant supply that are tied together by internal channels within the pump housing. Each channel can be joined to a different section (with its own PE 250 G pump element) and set to a unique cycle. Or they can all be combined to one lubrication circle. The optional GIGAmultitronic control unit can control and monitor up to three modes of lubrication. Normally, you would have to buy one pump per mode, but with the GIGAmultitronic, you just have to program each mode into the single pump.

The GIGAmultitronic control unit is also equipped with an operational database which records cycle time, lubrication time, operating hours, pump operating time, and much more. It will even create an event log of the last 100 changes of the settings. It will also shut off the system (and your machine) if it finds a critical error such as low grease levels.

Alternatively, you can order a GIGA PLUS with a GIGAtronic control unit or even without a control unit and use an external programmable logic controller (PLC).

With a maximum 300 bar operating pressure, the electric-drive GIGA PLUS pump delivers up to 12 cm³ (0.75 cubic inches or 0.40 fluid ounces) of lubricant per minute. The GIGA PLUS can operate in temperatures from -30°C to 70°C for reliable service year-round, and three sizes of reservoirs are available: 4, 8 and 16 kg (7.7, 17.6 and 35.3 lb).

About BEKA

BEKA is today's leading global brand of automatic lubrication systems for industrial, over-the-road and off-road applications. Since 1927, BEKA has been trusted by equipment manufacturers and owners for high quality, innovative central lubrication systems. BEKA and its dealer network delivers on the BEKA promise of environmentally friendly, trouble-free products that increase component life, reduce repair costs and increase the value of your equipment. We measure our success by your up-time.

In 2016, Beka-Lube Products Inc. became part of Baier + Köppel GmbH + Co. KG, of Bavaria, Germany, the manufacturer of BEKA-branded central lubrication systems. In America, BEKA systems are marketed and supported by the international BEKAWORLD LP group.

For more information about BEKA lubrication systems in Canada or the United States, please contact:
