TAKE HUMAN ERROR OUT OF THE EQUATION

Buffalo, NY – Auto-pilot, self-driving cars, robotic vacuums. Some things machines can do better than humans – and that includes lubrication. Beka-Max autolube systems will help you beat these common lubrication problems.

Overcome over-greasing

There can be too much of a good thing when it comes to lubrication. Bearings, for example work best in a precise volume of grease (outside diameter in inches x width in inches x 0.114 = grease quantity in ounces). Unless you know exactly how much grease your grease gun is dispensing, a couple strokes with a grease gun can add too much grease, cause overheating. Excess lubricant can also expose the system to contamination and ultimately shorten the bearings' life. Another problem with over-greasing is that it can lead to messes and safety hazards.

An autolube system delivers a precise amount of lubrication at scheduled times to avoid over-greasing.

Forget about remembering

It's easy to forget. Unless your company has rock-solid operating procedures that are used by everyone 100% of the time, you can guarantee that someone will forget to do an inspection, top-up the oil or re-grease a lubrication point somewhere along the way.

With auto-lubrication, mechanics and operators will not have to learn and remember to do these tasks, and fleet managers will not have to write, maintain and train people on operating procedures surrounding these tasks.

Good housekeeping is still important

Even the best automation system can't do everything. Humans are needed to refill the containers and replace old equipment. To eliminate the possibility that the humans will refill the containers with the wrong lubrication, it's important to label everything from the pump to the storage containers and grease guns. Establishing a labeling system will help you avoid cross-contamination.

About Beka-Max of America Inc.

BEKA is today's leading global brand of automatic lubrication systems for industrial, over-the-road and off-road applications. Since 1927, BEKA has been trusted by equipment manufacturers and owners for high quality innovative central lubrication systems. Across the US, Beka-Max of America Inc. and its dealer network delivers on the BEKA promise of environmentally friendly, trouble-free products that increase component life, reduce repair costs and increase the value of your equipment. We measure our success by your up-time.
