SAWMILLS SEE HUGE BENEFITS WITH AUTOLUBE SYSTEMS

Buffalo, NY – From your log yard to your sawline to the planer, a lot of grease is needed to keep a sawmill running smoothly. With a BekaWood central auto-lubrication system, you can realize cost savings and improved efficiency in each area of your operation.

Expensive lumber processing equipment is constantly exposed to sawdust and other contamination that can quickly cause damage or a fire unless all bushings are properly lubricated. Lubrication is more thorough and efficient if it's done while the machine is operating, but for safety reasons, it is impossible to do this manually. An autolube system is the solution. It will provide frequent, steady greasing – even in the danger zone – while keeping your maintenance crew out of harm's way. By reducing or eliminating the need for manual greasing, you'll also save money on labor.

Plus – an autolube system will save you time. You can run the sawline 24/7 without compromising maintenance standards. There's no need to stop the line or add another shift to lubricate.

BekaWood offers autolube solutions specially designed for the forestry industry. Depending on the size and complexity of your operation, BEKA can install an individually configured solution, consisting of one or several different lubrication systems. With our vast industry knowledge and experience, we can design and install a complete autolube system to match your needs.

We can also help you plan and budget for the installation, which can be done in several stages.

About BEKA

BEKA is today's leading global brand of automatic lubrication systems for industrial, over-the-road and off-road applications. Since 1927, BEKA has been trusted by equipment manufacturers and owners for high quality, innovative central lubrication systems. BEKA and its dealer network delivers on the BEKA promise of environmentally friendly, trouble-free products that increase component life, reduce repair costs and increase the value of your equipment. We measure our success by your up-time.

In 2016, Beka-Lube Products Inc. became part of Baier + Köppel GmbH + Co. KG, of Bavaria, Germany, the manufacturer of BEKA-branded central lubrication systems. In America, BEKA systems are marketed and supported by the international BEKAWORLD LP group.
